Gabriel do Prado Machry

IT Infrastructure Analyst I

Farroupilha, RS – Brazil gabrielmachry7889@gmail.com +55 55 98109-8273 linkedin.com/in/gabriel-machry

PROFESSIONAL SUMMARY

IT Infrastructure Analyst I at Grendene S/A with more than two years in 24/7 corporate environments. I joined through the Service Desk, moved into monitoring and now work on the infrastructure team.

I build custom monitoring checks in Nagios/OpMon (Perl, Python with NCPA and PowerShell), create Grafana dashboards and automate operational routines. I also administer Windows Server, VMware, Active Directory, Veeam backups and datacenter equipment.

Postgraduate degrees in Network Security and in Blockchain and Smart Contracts Security. Currently pursuing a Technology Degree in Systems Analysis and Development (IFRS).

TECHNICAL SKILLS

Monitoring and observability: Nagios, OpMon, NCPA, Grafana, dashboards, 24/7 monitoring

Automation and programming: Python, Perl, PowerShell

Infrastructure and datacenter: Windows Server, VMware, IIS, Active Directory, backup (Veeam), HPE iLO, HPE 3PAR, computer networks

Security and endpoints: Network security, email security (HSC), ManageEngine Endpoint Central, app management (APK)

Service Desk and systems: Agidesk, Qualitor, TOTVS ERP, Total IP (telephony), incident management

Data and productivity: Advanced Excel, reports and KPIs, technical documentation

PROFESSIONAL EXPERIENCE

Grendene S/A – Farroupilha, RS, Brazil (April 2024 – Present)

IT Infrastructure Analyst I | October 2026 – Present

- Monitor Veeam backup jobs and fix failures to keep data protection routines running.
- Apply updates to Windows servers through VMware.
- Create and apply updates to Internet Information Services (IIS) application pools.
- Create and distribute Android apps (APK) and run mass installations with ManageEngine Endpoint Central.
- Analyze and release suspicious or wrongly blocked emails on the HSC email security platform.
- Create monitoring for datacenter equipment and apply updates to HPE iLO servers and HPE 3PAR storage across 4 datacenters.
- Open tickets with vendors and responsible teams for maintenance or replacement of datacenter equipment.
- Maintain and evolve the monitoring checks (Nagios/OpMon) and dashboards (Grafana) I built.

Digital Media Assistant (Monitoring and Infrastructure) | March 2025 – September 2026

- Built custom monitoring checks in Nagios/OpMon with Perl, Python (NCPA) and PowerShell, covering servers and backup jobs (Veeam).
- Created Grafana dashboards to track access points, network and infrastructure indicators.
- Monitored critical 24/7 environments: alert detection, triage and escalation.
- Maintained technical documentation for monitoring checks and operating procedures.

IT Service Desk Assistant (overnight shift) | April 2024 – March 2025

- Handled incidents and requests through Agidesk, by chat and phone.
- Managed users and access in Active Directory.
- Supported TOTVS ERP systems.
- Followed OpMon alerts and escalated critical incidents to the responsible teams.

Lojas Colombo S/A – Farroupilha, RS, Brazil (September 2020 – April 2024)

Planning and Control Assistant | December 2023 – April 2024

- Produced strategic reports and studies, dashboards and operational forecasts.
- Monitored auxiliary systems.

Service Desk Attendant | February 2023 – March 2023

- Provided technical support through the Qualitor system and monitored alarms and events.
- Reported incidents to the responsible technical teams.

Planning and Control Assistant | October 2021 – February 2023

- Tracked performance indicators (KPIs) and produced cost reports and studies.
- Administered the Total IP telephony system and monitored virtual agents.
- Created dashboards and strategic spreadsheets.

Collections Operator | September 2020 – September 2021

- Negotiated with delinquent customers, followed up on agreements and worked on credit recovery.
